

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1 Claim 1 (currently amended): Absorption refrigerator (1)
2 comprising:
3 a cabinet having outer walls (2,3,4,5,6) and at least one
4 door (7,8), said cabinet enclosing a low temperature storage
5 compartment (9) and a higher temperature storage compartment
6 (10), said compartments being essentially sealed from each other
7 and separated by a partition wall (11), said partition wall
8 being arranged inside the cabinet and generally perpendicular to
9 a first wall (2) of said outer walls, and
10 an absorption refrigerating system including an evaporator
11 tube (20) comprising a first evaporator tube section (21) for
12 cooling the low temperature compartment and a second evaporator
13 tube section (22) for cooling the higher temperature compartment,
14 said second evaporator tube section being arranged downstream of
15 said first evaporator tube section with respect to a direction
16 of flow of a coolant,
17 wherein a substantial portion of said first evaporator tube
18 section (21) is arranged generally in parallel with said
19 partition wall (11), and wherein said substantial portion of the
20 first tube section (21) includes two non-coaxial tube portions
21 (21a), the axes of said tube portions together defining a general
22 extension plane of said substantial portion of the first
23 evaporator section, said general extension plane being arranged
24 generally in parallel with said partition wall (11).

Claim 2 (cancelled)

1 Claim 3 (currently amended): Refrigerator according to
2 claim [[2]] 1, wherein the general extension plane of the
3 substantial portion of the first evaporator tube section (21) is
4 arranged generally parallel to and closer to the partition wall
5 (11) than to each of said outer walls.

1 Claim 4 (currently amended): Refrigerator according to ~~any~~
2 ~~of claims~~ claim 1 to or 3, wherein said first wall (2) is a rear
3 wall being arranged opposite to the door (7,8) and said partition
4 wall (11) is extending in parallel with a generally vertical
5 plane between the back wall (2) and the door (7,8).

1 Claim 5 (currently amended): Refrigerator according to ~~any~~
2 ~~of claims~~ claim 1 to or 3 wherein said substantial portion of
3 said first evaporator tube section (21) is arranged adjacent a
4 surface said partition wall (11), said surface of said partition
5 wall facing the low temperature storage compartment (9).

1 Claim 6 (currently amended): Refrigerator according to ~~any~~
2 ~~of claims~~ claim 1 to or 3, wherein a gap (33) is formed between
3 said substantial portion of said first evaporator tube section
4 (21) and said partition wall (11).

1 Claim 7 (currently amended): Refrigerator according to ~~any~~
2 ~~of claims~~ claim 1 to or 3, wherein said substantial portion of

3 said first evaporator tube section (21) is arranged at least
4 partly within said partition wall (11).

1 Claim 8 (currently amended): Refrigerator according to
2 ~~any of claims~~ claim 1 to or 3, wherein said first evaporator
3 tube section (21) is provided with heat transferring flanges
4 (34).

1 Claim 9 (currently amended): Refrigerator according to ~~any~~
2 ~~of claims~~ claim 1 to or 3, wherein said second evaporator tube
3 section (22) is arranged generally in parallel with said first
4 wall (2).

1 Claim 10 (currently amended): Refrigerator according to
2 ~~any of claims~~ claim 1 to or 3, wherein said second evaporator
3 section (22) is arranged generally in parallel with the partition
4 wall (11), at an opposite side of the partition wall from the
5 first evaporator tube section (21).

Appl. No. 10/619,675
Amdt. Dated August 9, 2004
